Chuck Gorman, SCDHEC
Marianna DePratter, SCDHEC

* Members of the ER Committee

Note: Perry Holcomb and Ann Dalton, of the ER Committee were unable to attend the meeting.

Introduction

Jimmy Mackey introduced himself and asked other attendees to identify themselves. Mr. Mackey announced that Doreen Richardson had agreed to serve as Vice Chair.

Schedule Review

Paul Sauerborn reviewed the 2002 schedule. He asked that if anyone had additional items to be reviewed to tell Mr. Mackey or Mr. Sauerborn.

CAB ER Recommendations – Status

Mr. Mackey addressed the status of the following CAB ER Committee Recommendations:

#122 Open to Closed – EPA stated their letter dated June 19th regarding Savannah River TMDL is their response to the recommendation.

#123 Closed - EPA concurs with all items addressed to date

#134 Open to Closed

#145 Pending to Closed

#150 Pending to Open – The ER Committee would like to know how the local SR money will be allocated

#151 Pending to Closed

Full-scale Dynamic Underground Stripping (DUS) Draft Motion

Mr. Mackey stated that he was in support of the motion but was concerned that there was little information on the long term effects of the heated soil returning to its original state. Mr. Mackey was

particularly interested in the replenishment of the microbial population to the effected area. Chris Bergren stated that over time there would be more data to support his inquiry and the motion clearly makes that request to give an update to the CAB by December of 2002. Marianna DePrater stated that the SCDHEC sees the DUS application as being very cost effective at source clean up of DNAPL, and the pump and treat operation would handle the clean up of the distal plume. There were minimal changes to the motion and Mr. Mackey was satisfied that it could now move forward for the full board review and approval the day following this meeting.

There being no public comments, Mr. Mackey closed the meeting.
